

MONSTER FINE SHREDDER TO PRODUCE SUBSTITUTE FUEL FOR THE CEMENT INDUSTRY

Installation: Lassila & Tikanoja Oyj, Extension of Turku Plant, Finland

Equipment: MONSTER 9905Z Fine Shredder Capacity 15 t/h (20 mm)
Conveyors
Electrification & automation
Three-trailer loading station

Project description: The fine shredder Monster has been installed at the existing Turku plant delivered by BMH Enviro in 2005 to process light fraction coming from the earlier delivered air-classifier into the size of about 20 mm. The product is used as substitute fuel in cement kilns. The trailers are filled automatically direct from the conveyor line.

Start-up October 2007
